

Our Mission

is leading research in precision nutrition by understanding how genetics and environment affect an individual's requirements for and responses to nutrients.

Our Vision

is to use scientific discovery to ensure optimal health through individualized nutrition.

Our Core Values

are the shared values to which we commit ourselves for how we conduct our work at the NRI and the way we approach our mission and vision.

Integrity

We conduct ourselves with integrity in all our scientific, business, and community endeavors.

Innovation

We are innovative and compassionate in our approaches to complex issues in precision nutrition.

Collaboration

We work together to achieve collective and individual goals because we believe that multiple perspectives promote better outcomes.

Inclusion and Respect

We foster an environment of respect and inclusiveness, where open inquiry and expression are embraced.

Dedication

We are determined to excel in every aspect of our research enterprise.

Research Excellence

We are responsible for conducting publicly and privately funded innovative research with excellence.
